Making Solar Power Affordable

Jackson EMC has supported energy efficiency through various programs and services, including the use of reliable renewable energy technologies. As a way to encourage the adoption of these proven resources, Jackson EMC offers two rebate programs to help make solar powered systems more affordable to its customers and our members.

Associated Credit Union is offering special financing for both Solar Rebate programs if you are a Jackson EMC customer. Contact ACU at 770.448-8200, Ext. 2141 or www.acuonline.org

Sun Power Rebate Program

The program uses (1) photovoltaic (PV) cells to convert light from the sun directly into electricity, or (2) solar collectors to heat water using sunlight. The benefits of these technologies include:

- Clean, safe and renewable energy source
- Modular system that can grow with demand
- Conserves our natural resources
- Reduces the environmental impact of energy production

Financial Incentives

Solar Powered Home: A one-time rebate of \$450 per kilowatt (kW) installed, up to 10kW for members who qualify. Federal and State tax credits may also apply.

Solar Water Heater: A one-time \$450 rebate for members who qualify. Federal and State tax credits may also apply.
